

# Do Your Part... Join Now!

Let your membership \$\$ support the P.R. Fund of the Unified, Oklahoma Chiropractic's only Association whose mission and purpose is to represent the majority if not all D.C.'s at the Capitol and continue to promote and protect Chiropractic's interests and those of the patients we serve.

**Step up and be counted.** Become a family member of the **Unified Chiropractic Association of Oklahoma.** Imagine what "your" tax deductible membership dues, combined with those from several hundred other DC's, could do to promote **Chiropractic.** *We are all in this state and national challenge together.* The UCA Board and other members would greatly appreciate you doing your part to help pay the Lobbyist that represents you at the Capitol.

Unlike Associations in other states with \$600.00 mandatory membership dues in addition to seminar tuitions, The Unified Chiropractic Association's revenue is limited due to two Associations vying for CE tuitions from a small number of licensees. At one point, the UCA's competitor (OCA) who inherited OSCIPA clients' leftover "fees for service" dollars, used that to their advantage by sponsoring a "free" CE in order to entice DC's who usually attend UCA seminars away to theirs. Consequently, even though the UCA's meager revenues are spent frugally, it does not leave enough to pay for much more than the Lobbyists' wages, seminar and miscellaneous expenses and 22 out of approximately 60 – 100 hours of secretarial and administrative labor per week. The **Unified wants to better serve you and your patients. Your dues are an investment in your Chiropractic future. Do your part. Join Now!**

**July 1, '17 thru June 30, '18 any membership level will get you....**

- ❖ **ACCESS** to the UCA "List Serve"; Website "**members only**" page; **weekly News Flashes...** (practice/clinical pearls, webinars, insurance tips, Okla. & National Chiropractic Issues/Legislation)

## If You Are Concerned & Question:

Exp. Date: \_\_\_\_\_ Sec. Code: \_\_\_\_\_

- Lack of Public Relations to expand awareness to Legislators & the public about Chiropractic efficacy
- Worker's Compensation System Exclusion & Insurances disparity/discrimination against Chiropractic.
- Why, after 35 years of DC's Certified in Injectible Nutrients, are they being refused products by distributors.
- Why, did the OBCE, after unanimously approving the UCA's amended verbiage to clarify the supplement & Homeopathic section of Scope and rectify the problem, allow the OCA to break their promise to file the Bill
- Why OCA leadership has suggested the OBCE eliminate needle Acupuncture. Is it because they believe it is outside our Scope, like injecting nutrients, or because their sister Practice Management Group instructs to only sparking one Auriculo-point, they do not want their competitors to administer what the patient expected.
- The Okla. Chiropractic Association's disregard of other healthcare entities' advancements enabling them to invade and utilize procedures in our Scope of Practice and how that will shrink Market Share?
- Is the OCA leadership's paranoia of limited Pharmaceutical authority for appropriately trained DC, all about the fear of losing Chiropractic's drug free legacy or the fear of their competing colleague's new Reputation?
- The OCA Leadership making practice style and philosophy a preference rather than the majority's needs.

**Then invest your seminar and membership \$\$ with the Unified**
